

Nil Monreal Gálvez

As a financial analyst, I utilize advanced Excel to analyze data and provide business insights, and I also automate processes using Python to improve reporting efficiency. Currently, I'm expanding my expertise in machine learning and AI, with the goal of developing AI-driven financial models for better decision-making. Additionally, I'm eager to bring my skills to the U.S. market and contribute to a dynamic company in a key financial hub.

Work Experience

Financial Analyst, EZ Air Interiors (Embraer - Safran)

May 2024 - Present

- Identified, analyzed, and interpreted financial data to provide actionable insights to managers for achieving business goals.
- Analyzed financial data to offer forecasting support and prepare detailed reports and projections based on key metrics.
- Organized data into accessible formats, performing various types of analysis to drive business performance.
- Oversaw critical financial functions including auditing, budgeting, planning, taxes, cost control, and project management.
- Conducted accounts reconciliation and analysis to ensure accuracy in financial reporting.
- Developed Python scripts to automate processes, improving operational efficiency.
- Streamlined and optimized financial processes to enhance overall business performance.

Accounts Payable Specialist, Staycity Group

April 2023 - April 2024

- Liaised with Operations Managers on new Purchase Orders and Capital Expenditure Reports.
- Tracked open and dropped POs in a database for accurate record-keeping.
- Reviewed PO requests for accuracy, including General Ledgers and property details.
- Responded to supplier and property queries, ensuring clear communication.
- Performed vendor account reconciliations and supported month-end closing activities.
- Collaborated with internal and external business partners to resolve Accounts Payable inquiries efficiently.
- Lead automation projects to improve process efficiency using Microsoft Dynamics 360

Junior Accountant, Dalata Group

Apr 2022 - Apr 2023

- Ensured accurate recording of all sales and implemented a robust issue-highlighting system to enhance operational transparency.
- Prepared daily sales KPI reports for departments and maintained sales records across multiple hotel systems.
- Managed daily income audits, monitored cash handling procedures, and provided comprehensive cash handling training.
- Oversaw petty cash management and ensured optimal cash levels by managing orders and cash flow.
- Effectively recorded, invoiced, and followed up on payments, while tracking and monitoring debtors periodically to maintain financial control.
- Maintained the purchasing system, reconciled creditor statements, and handled supplier queries to ensure smooth accounts payable operations.

Educational Background

American Institute of CPAs and Chartered Institute of Management Accountants (AICPA) (CIMA)

Feb 2024 - Feb 2026

- Specialized in business finance and accounting, offering a comprehensive blend of accounting practices, financial management, and strategic business leadership. This focus integrates in-depth financial analysis with advanced accounting techniques to drive business performance, emphasizing both operational efficiency and long-term financial planning. With a strong foundation in business strategy, this discipline equips professionals with the skills to make informed decisions that align financial goals with overall corporate objectives, positioning businesses for sustained growth and competitive advantage.

Python Course

London App Brewery

Jan 2024 - Sep 2024

- Mastered Python programming through 100 projects, gaining expertise in automation, web development, data science, machine learning, and tools like Flask, Pandas, and Matplotlib, while building a diverse portfolio including websites, web applications, games, and desktop applications.

Degree in Business and Finance

INS Vall Hebron

Sep 2020 - Jun 2022

- I successfully completed modules in areas such as Communication, Business Processes, HR, Financial Management, Accounting, Logistics, and Office Applications, with standout performances in Accounting and Taxation, as well as practical experience through a work placement.
